

Plain type Jamming Signal Detector

Expose Mobile connection interruption of GPS tracking system

Made for direct use, no need of professional electronic training or knowledge

**How if criminal using signal jammer to
Disable Mobile / WiFi connection of
GPS Tracking system and Internet of Things ?**

Fleet management applies GPS tracking systems to trucks, trailers, delivery vans, and rental cars. By continuously checking up-to-date location information and identifying vehicles that deviate or disappear from planned routes or cross specific boundaries.

Smart criminal uses signal jammer disconnecting the communication between truck and control center to steal expensive cars and lorries carrying valuable loads.

This device is made to take precautions against the criminal using signal jammer to disable the Mobile and GPS connection of GPS tracking system. This device will issue alert (warning trigger) back to control center to notify the attempted theft / robbery, before the mobile communication of GPS tracking system is blocked.

● **WITHOUT INTERFERE WITH DIGITAL SIGNAL**

This device will not be interfered with digital signals. It will not cause any false alarm if someone uses cell phone nearby or install this device in the environment with WiFi, DECT phone or Bluetooth, etc.

● **ALARM OUTPUT**

This device has NO-NC (Normal Open, Normal Close) relay output, other kind of alarm output is also available upon request.

Specifications:

Size	L 9 x W 5 x T 1.7 cm
Weight	about 60 g
Power	12V – 24V DC, 50 mA
Detecting Frequency	Wideband jammer of GPS and cellphone frequency bands
Bandwidth Resolution	FULL band detection
Frequency scan timing for jamming signal	Always detecting
Handling of jamming signal	Instant activate relay output after verified the jamming signal
Alarm output	1.0A relay, with NO-NC output

* **NOTE:** This device is not good for narrowband jammer (single channel transmitter).
