

Made for general use, no need of professional electronic training or knowledge.

SH-055U7

Superior sensitivity RF Bug Detector with acoustic display

This model is the newest top quality portable RF bug detector. It can be used to detect and locate hidden transmitters (bugs) in your home, office, or car, and also wireless spy cameras, cellular phones, satellite phone and other radio frequency devices.

SH-055U7 performs a professional RF sweep of your premises. Designed with the latest in microchip countermeasure technology, it has an operational range of 50 MHz to 6.0 GHz. This state-of-the-art unit has features that normally reserved for bigger more pricey units.

Specially designed for easy and simple use, which does not require complicated installation or any professional knowledge.

Find bug in silent place

There are many audio receivers in market; they can receive and demodulate audio signals to acoustic display in more than 5 meters away. But those receivers are useless if none talks in the scanning place.

SH-055U7 is a superior sensitivity detector; it can detect all radio frequency signals between 50 MHz and 6.0 GHz. It can catch the hidden transmitter (bug), no matter there are people in talk or not.

After detecting the signal, you can set the switch to "**acoustic display**" to verify if the signal is audio signal.

Find signal source of bug

All the audio receivers can display the voice in more than 5 meters away if there is a bug and has people in talk, but could not help you to find where the bug is.

SH-055U7 has a **sensitivity tuner**. When detecting the signal, you can lower the sensitivity a little and a little, and then approach gradually to find the signal source.

Upper side of SH-055U7

Unique acoustic display

Some companies supply bug detector, but none of them has acoustic display. They are just signal detectors for lower frequency band less than 500 MHz.

SH-055U7 has three kinds of warning mode for selection: sound, acoustic and vibration (**B A V**). After detecting signals, you can set the switch at acoustic to hear and check the signal. If it is audio signal, SH-055U7 will broadcast the voice.

Made for general use, no need of professional electronic training or knowledge.

■ Not only a bug detector

SH-055U7 is not only good at detecting bug, but also has excellent ability in the operational range of 50 MHz to 6.0 GHz. It can catch all kinds of wireless spy camera and detect mobile phone signal.

■ No interference with radio station

The audio receivers have good ability in audio signal, so you will hear a lot of radio station programs during your scan. Those audio receivers seem high priced radio. It makes your scan annoying and complicated, you will miss the real bug signal easily.

SH-055U7 will not mistake the radio station signal for bug signal. The radio station programs will not distract you from your scan job.

■ Battery low warning

SH-055U7 has built-in rechargeable battery pack. After full charge, the battery power can last 1 day for continuous use. When the battery runs down, the very right LED will go red to notify the user.

■ Specifications:

Detecting range	50 MHz - 6.0 GHz
Dimension	L 14 x W 7 x T 2.5 cm
Weight	about 200 g
Power	<ul style="list-style-type: none"> • 12V DC 1A switching power adaptor • Built-in rechargeable battery pack
Warning mode	<ul style="list-style-type: none"> • LED indication • Beep alarm sound • Acoustic display • Vibration • Earphone silent detection
Sensitivity Tuner	<ul style="list-style-type: none"> • Adjust detecting distance to find signal source • Eliminate the environment interference
Detecting Distance	
Wireless bug	up to 20 feet (beep) up to 10 feet (acoustic)
2.4GHz Wireless camera	up to 8 feet (regular 10mW camera)
1.2GHz Wireless camera	up to 12 feet (regular 10mW camera)
2G Cellular phone	up to 35 feet

* The detecting distance of wireless bug and mobile phone will be varied depending on the signal strength.

**OEM/ODM
are welcome**
